

SHANU P

Software Developer | Python Full Stack Developer

shanualr2o@gmail.com | www.linkedin.com/in/shanu-p-636b57303 | github.com/Shanu-sp | 9567711612

Summary

- **Entry-level Python Full Stack Developer** with a strong foundation in **Python, Django, React.js** and **modern web development**.
- Completed training and projects focused on full-stack applications using **MVC architecture, REST APIs, and MySQL integration**.
- Skilled in **authentication, session management, responsive UI** development, and writing clean, maintainable code.
- Familiar with **REST API development, database design, Git**, debugging, problem-solving, and **responsive web design**.
- Exposure to **AI-assisted development workflows**, prompt engineering, and using AI tools for coding, debugging, optimization, and productivity.
- Basic understanding of **integrating AI-powered solutions** into applications, with interest in **Generative AI and emerging technologies**.

Education

BE-Electronics and Communication Engineering Dhanalakshmi Srinivasan College of Engineering-Anna University	09/2018 – 07/2022 Coimbatore, India
Higher Secondary Education - Plus two GVHSS Alanallur	06/2016 – 05/2018 Alanallur, Kerala
SSLC GVHSS Alanallur	06/2015 – 04/2016 Alanallur, Kerala

Skills

Programming Languages: Python, JavaScript

Backend Technologies: Django, Django REST Framework

Frontend Technologies: HTML, CSS, React.js, Bootstrap

Databases: MySQL, PostgreSQL

Concepts: Object-Oriented Programming (OOP), MVC Architecture, Authentication & Session Management, REST API Integration

Tools and Technologies: Git, GitHub, Postman, VS Code, Version Control Systems

Projects

E-Commerce Web Application - Shoestore • Developed a full-stack E-commerce application using Python, Django, and MySQL with authentication, cart, and checkout features. • Implemented session-based cart management to support multiple concurrent users. • Enhanced a responsive user interface using HTML, CSS, JavaScript, and Bootstrap.	2025
Personal Portfolio Website (React.js) • Designed a personal portfolio website using React.js to showcase projects and technical skills, and GitHub repositories. • Implemented modern UI design with smooth navigation and structured project sections.	2026
Instagram UI clone • Developed an Instagram-inspired user interface using HTML and CSS . • Designed responsive layouts including navigation bar and post feed using Flexbox and CSS styling. • Focused on modern UI design principles and pixel-perfect layout implementation.	2025
IoT-Based Air Quality Monitoring System • Built a real-time air quality monitoring system using IoT technologies . • Measured air quality parameters using MQ135 sensor and monitored carbon monoxide (CO) levels using MQ7 sensor . • Implemented real-time data visualization and monitoring using the ThingSpeak IoT platform .	2022

Professional Experience

Concentrix - Customer Support Executive • Handled customer issues using CRM tools, ensuring timely resolution under strict SLA deadlines • Managed high-volume queries in fast-paced environments, demonstrating strong problem-solving under pressure • Analyzed user issues and provided structured solutions , improving troubleshooting and analytical thinking • Collaborated with internal teams to escalate and resolve complex cases efficiently	03/2024 – 10/2024 Bangalore, India
